

Plumber's Handle/Sleeve Puller Kit – Item 3875

Handle Puller Instructions:

- Turn off water at the supply line valve.
- Turn handle of puller counterclockwise until tip clears handle.
- Place arms under the handle and hold grip bar firmly while turning threaded shaft point down into screw hole until faucet handle is free.

Compression Sleeve Puller Instructions:

- Turn off water at the main valve and remove angle stop.
- Insert sleeve puller into copper tubing.
- Insert shaft point of faucet puller into hole and place jaws of puller behind compression nut.
- Turn handle of puller and remove nut and sleeve just like you would pull a faucet handle. Some tapping of the puller may be necessary to remove sleeve and nut.
